

Completed May 1998

Builder: Gary Storey w/Storey Construction

Architect: World Renown; Fred Fisher. Fred has built museums all over the United States and other large homes throughout the U.S.

The house was built with the concept in mind that it would be “timeless” to never feel dated. Some of the design features to accomplish this are: no moldings or trimmings on windows, no baseboards on floors, using the same tile, slate and stone throughout the house, etc.

Used the vernacular of the west. The materials are all local to the west.

100-year-old fir wood was purchased and milled for the home. This wood is used on the floor throughout the house and on the siding of the house. Also used on the round dining room table.

A Blue Stone from England is used in the master bath

Kitchen counter is a blue stone from Maine

The windowpanes used on the front entry door, dry sauna door and divider doors are 100-year-old windows from England. They are referred to as “lights”

There are 5 Molesworth doors throughout the house. The doorframes were sized to fit the doors rather than cross the integrity.

The black horse rail located at the kitchen door is also Molesworth.

Two of the guest bathroom vanities are made from 100-year- old antique cabinets

The rock from the fireplace mantel is cut from the rock deck off of silo.

7 bedrooms (including master bedroom) with full bathrooms including 4 Jacuzzi tubs, 5 bedrooms with black out shades

Master bedroom equipped with drop down movie screen and surround sound system

Master bathroom has 2 walk-in closets with floor safes, 2 vanities, Steam shower, custom built bath tub for 2, power toilet, bidet, and 2 heated towel racks

5 Powder rooms

Great room, Entertainment Room and Master Bedroom have electric window coverings

2 offices

3 Car garage

All garage doors on both the Main house and Caretaker house are custom designed and built. They open to the side rather than up and down.

The art gallery and gallery storage could be remodel into 2 guest bedrooms and bathrooms or used as a large party area with the service kitchen located

right next to it.

Indoor spa area with massage room, steam room, dry sauna, Jacuzzi, English  
Antique marble columns, shower and gym

Outdoor top deck lap swimming pool and Jacuzzi

Cabinetry through out the house is all Cherry wood

The walls are raw plaster. They have plywood walls behind to hold art. Some of  
the raw plaster has been painted over time.

Restaurant design kitchen. Walk-in refrigerator and freezer. 6 drawer  
refrigerators, breakfast refrigerator, 2 drawer freezers, built in wok, large  
roisserie oven, pizza oven, warming drawer, Convection oven, microwave,  
Dynasty Range with double oven, 2 dishwashers, 2 sinks, multiple cooking and  
baking islands, small appliance cabinet, built-in espresso machine, 3 wine  
cellars, large pantry

2 full wet bars equipped with sinks, ice makers and subzero fridges

Dumb-waiter

Entertainment room with drop down movie screen, surround sound system,  
black out shades, media cabinets

4 fireplaces

Large sliding doors in Great room, Spa, Art Gallery and hallway all slide into

walls making the outside part of the inside

Sound system throughout entire house

Night-lights and security lights throughout house. All lighting can be program

Large laundry room to accommodate the size of the home

Elevator

Central Vacuum throughout the house

4 Triangle Boilers to heat and cool houses, pool and Jacuzzi's, hot water and snow melt. The house is heated and cooled with water running through the pipes under the floors and then vented forced air. The bathrooms and spa have radiant floor heat. Master bedroom and Entertainment room have their own units to be able to have heat or air conditioning any time of the year. The garage floors are all heated when running heat.

Caretaker house w/ 3 car garage, 2 bedrooms and 1 1/2 bathroom

Snowmelt on driveway and entryways

Green house, operational year round

Gated entry

The outside landscaping and acreage has been kept as natural as possible to not disturb the wild habitat

Rock weeping wall is designed to look like the water is weeping from the pool above flowing down into the trough.

There is a sprinkler system throughout the entire inside of house in case of fire

There are 5 pumps under the main house and 2 pumps under the caretaker house to pump out water during periods of high water table

House is designed around the courtyard with the concept in mind of protecting the interior garden

House is situated so the main view is of the mountains

There are numerous pathways throughout the forest for walking and ATV

Generator located in Caretaker garage which during a power outage runs some outlets in the kitchen, refrigerators and freezers, lights in kitchen and lights and some outlets in Master Bedroom

Well water with 3 large holding tanks to filter water before entering the house

Creek flows around the house and island. The island could possibly be converted to a pond

The house has been published
